

Mohan Patt

VP, Core Product Experience

Mohan oversees product and engineering for our core marketplace technology division, whose primary mission is to make eBay the shopping destination of choice. As part of his responsibilities, Mohan manages the buyer experience team in delivering on unparalleled experiences for consumers and the seller experience team in delivering velocity for our merchants. He also manages our structured data efforts in building the world's biggest product catalog, organizing and curating more than 1.1 billion listings on our marketplace in ways that aim to deliver relevant, persistent and personalized experiences for consumers.

Mohan's Favorite eBay Experience

“My son loves NFL football and Madden. A few years ago we got him a “Happy Meal” and the toy that came with it was football players representing an NFL team. He really wanted to collect all the 32 teams and there is no place better than eBay to fulfill your passions. We would search, bid, and my son paid for all the 32 teams by selling his old toys on eBay. It was a fun experience and one that both he and I will remember forever.”

An experienced product and engineering leader with a passion for product strategy, Mohan joined eBay in 2005 and formed the verticals team starting with eBay motors, where he led the growth of the auto parts business to be a global market leader. During his 12-year tenure at eBay, Mohan has helped eBay become a global commerce platform with a top rated mobile shopping experience.

Mohan earned both bachelor and master degrees in Computer Science from New Jersey Institute of Technology and R.V. College of Engineering in Bangalore, respectively, and holds four patents.

Mohan is a huge believer in mentorship and a champion of eBay's diversity and inclusion initiative.

When not reimagining user experiences at eBay, he enjoys playing basketball with his son, as well as buying and selling toys and electronics with his kids, especially on the eBay app.
