

Steve Fisher

SVP, Payments

Steve leads the strategy and execution of our payments initiative, overseeing the transformation required to manage payments on our Marketplace platform to significantly improve the end-to-end customer experience. His responsibilities include overseeing the strategy, business, product, risk and engineering efforts for payments.

Steve's Favorite eBay Experience

“My brother is a passionate collector of first edition presidential biographies, and he spent a recent family vacation obsessing over his saved searches and bids on eBay.”

Steve joined eBay in September 2014 as Chief Technology Officer and led eBay's core product and technology team, including the global product managers, engineers and technology professionals who deliver our trusted global marketplace, compelling multi-screen experiences, core marketplace capabilities, and big data insights. He was CTO for nearly four years.

Prior to eBay, Steve was at Salesforce.com, where he served as executive vice president of technology. There, he led a team of software developers, quality engineers, and infrastructure engineers developing award-winning software which is used by 100,000 companies worldwide, including eBay.

Prior to Salesforce, Steve held engineering positions at Apple and AT&T Labs.

He founded a start-up, NotifyMe Networks, which is an interactive voice-alerting platform application service provider, and went on to lead it as chief executive.

Steve has a B.S. in Mathematical and Computational Science and an M.S. in Computer Science from Stanford University.

A tireless innovator, Steve holds 21 patents.
