

Steve's Favorite eBay Experience

“My brother is a passionate collector of first edition presidential biographies, and he spent a recent family vacation obsessing over his saved searches and bids on eBay.”

Steve Fisher

SVP, Chief Technology Officer

As eBay’s Chief Technology Officer, Steve Fisher drives our overall technology vision and strategy -- leading a global team responsible for the end-to-end eBay product experience and technology platform.

In addition, Steve leads the strategy and execution of our payments initiative, overseeing the transformation required to manage payments on our Marketplace platform to significantly improve the overall customer experience.

Steve joined eBay in September 2014 after 10 years at Salesforce.com, where he served as executive vice president of technology. There, he led a team of software developers, quality engineers, and infrastructure engineers developing award-winning software which is used by 100,000 companies worldwide, including eBay.

Prior to Salesforce, Steve held engineering positions at Apple and AT&T Labs.

He founded a start-up, NotifyMe Networks, which is an interactive voice-alerting platform application service provider, and went on to lead it as chief executive.

Steve has a B.S. in Mathematical and Computational Science and an M.S. in Computer Science from Stanford University.

A tireless innovator, Steve holds 21 patents.
